Abstract:

This template abstract provides guidelines for abstract formatting. There are not many rules to follow, and we recommend all authors read them carefully before submission. These guidelines are in themselves formatted as your abstract should be formatted, so if when you are done your abstract does not look similar to this document, you might have done something wrong.

Include a blank line between paragraphs.

The text should be written in English, using a 12 pt Times New Roman font and single spacing. Abstracts should have a minimum of 250 and a maximum of 500 words, and should not exceed 1 A4 page.

No formulae are allowed on the abstract (yes, it is possible, be creative!). Some special symbols and Greek letters are available via the web form. Feel free to copy-paste from a text file, but avoid copy pasting anything that is not plain text. The only non-plain text allowed is that available through the options on the web page menu (including special symbols, italics, subscripts and superscripts).

The references to books and papers should follow the format presented below, and should be referenced in the text as (Looks et al, 1994) or (What, 2017). We recommend only these types of sources are used, but authors can adapt the style in a coherent way if they must use any other type of reference. Authors should include at most 2 references. References to unpublished material are not allowed.

We look forward to see your contributions to ISEC 2018.
